

# Tag Holder & Card Clip

## Mounting accessories for the Compact Tag

### Key features

- Easy windshield mounting
- Card can be removed if required
- Front of tag remains clearly visible

### Tag holder

The Tag Holder is suitable for windshield mounting of the Compact Tag. The holder is suitable for credit card sized tags and is attached to the inside of the windshield by two suction pads. This holder is designed to fit a card with a total thickness of up to 5 mm [0.2 in].

The card is held in place by two narrow edges along the long sides. The design, a spring mounted tongue on the back, and the choice of material mean that a card fits securely in the holder and can also be removed when required. Due to the special design the front of the tag remains visible to ensure that laser engraved markings (e.g. text or barcode) can be clearly read.

The tag is effectively protected in the Tag Holder. The Tag Holder is made of transparent polycarbonate, which is both environment-friendly and very strong, ensuring long life for the holder.

### Card Clip

A chrome metal crocodile clip with a nylon strap. The strap is easily threaded through the oval holes in the tag and snapped together for assembly.
